Off-Platform Project: Abruptly Goblins

In this off-platform project you will be the proprietor of a comic and games store, the Sorcery Society, and you decide to host a game night to play the hot new tabletop RPG Abruptly Goblins! You'll be writing your own Python functions and using dictionaries to provide a new service to gaming attendees of your shop.

Your beloved clientele want to organize a game night at your comics store! Create a system for organizing and tracking gamer's availability. Programmatically figure out the best day to host a game night and send out emails to your attendees to let them know when to come. Follow the steps below to get started with your project!

Working on Your Computer

1. If you've never used the command line, we recommend taking the [Learn the Command Line course](#).
2. Install Python by following the directions in this article on [Installing Python](#).
3. Learn about [Jupyter Notebooks](#), a cool way of combining Python code with explanations or instruction in a web terminal.
